

Multiplying Values

“It doesn’t matter how hard you work at something, if what you are doing is the **WRONG** thing.”

In order to have a culture that **multiplies** its efforts, we need to prioritize certain values.

What are you currently prioritizing as your top values?

The Two “Must-have” Values:

1. **Have an External Focus.** It is crucial that every organization place a priority on the people who are *outside* of the walls of our church or ministry.

What does that value look like within your organization?

Is it prioritized as a ‘must-have’?

2. **Prioritize Developers over Practitioners.** It is also essential that every organization prioritize *first* the development of leaders *and then* do the actual work needed. When you focus on developing leaders, vs. doing the work, you win.

What would need to change with you and the other leaders in your organization in order for this value to be lived into?

Can you commit to these two values of a Multiplying culture?
